

Study design: CANVAS re-implementation, CRC-trained, breast-applied

Substituted from the original paper (CODEX NSCLC, same-section H&E, MUSK):

- 56-plex CODEX CRC (Schurch) replaces 41-plex CODEX NSCLC for CN discovery
- Orion IF+H&E (CRC) replaces same-cancer paired H&E; trained on CRC, applied to breast
- Phikon (frozen) replaces MUSK (fine-tuned) - see T10 for the full list

Source: pipeline design (PROTOCOL.md, config/crc_train_brca_apply.yaml). Not derived from any run.
